## **MAXCUT® CONCRETE CHAINS**

Faster Cutting. Lower Stretch. Built to Perform.

MaxCut® offers some of the fastest-cutting, most efficient, and lowest-stretch concrete chains on the market. What sets MaxCut® apart is our highly experienced engineering and development team. Our in-house experts continuously test, refine, and improve every chain using real-world field feedback, ensuring superior performance, durability, and safety.

## **ENGINEERED FOR PERFORMANCE**

- Revolutionary crown-shaped segments expose diamonds for faster initial cutting
- Segments on every link deliver smoother cuts, reduced vibration, and less operator fatigue.
- Advanced debris protection on MaxCut® chains with integrated bumper protection to reduce segment breakage.
- Automated laser welding for consistent quality and long service life
- Designed to efficiently cut concrete, brick, and decorative stone.
- More robust alloy selection with specialized surface treatment for extended durability.

## **CONFIGURATIONS AVAILABLE**

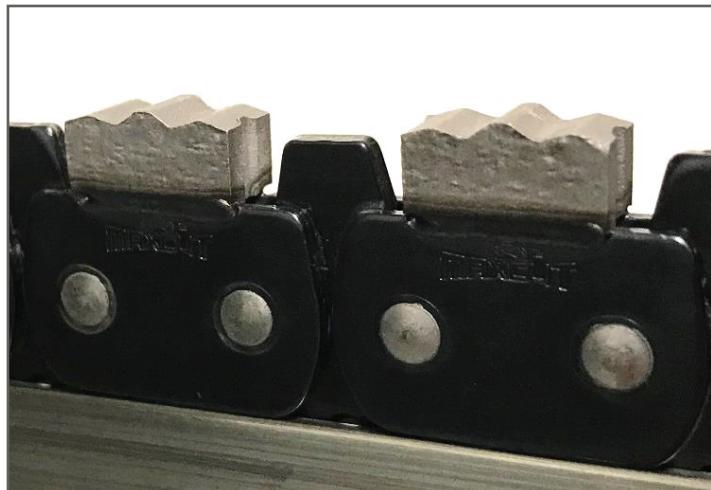

### **Pitch Options**

**MC1** – 0.375" pitch

**MC1E** – 0.375" pitch

(with alternating segment links)

**MZ3** – 0.456" pitch

### **Segment Options**

**S** – Speed Segments

**PL** – Premium Life Segments

**Multiple configurations available to match  
your equipment and application needs.**
